Neves, R. 1958. Upper Carboniferous Plant Spore Assemblages from the Gastrioceras subcrenatum horizon, North Staffordshire. Geol. Mag., xcv, 1-19.

BOTANY DEPT., UNIVERSITY COLLEGE, LONDON. 12th April, 1958. W. G. CHALONER.

NOTICE

University of New England, Armidale, N.S.W.

In February a fire at the University of New England destroyed a large percentage of the Department of Geology, including the entire Overseas Rock and Mineral collections, and the Collection of Departmental Reprints.

Whilst it has been possible to purchase selected overseas rock and mineral specimens, the bulk of the material destroyed was of a type not stocked by dealers, e.g. mineral and rock collections from particular areas possessing both teaching and research value.

The Department of Geology would be most grateful of any offers of duplicate reprints, rock and mineral collections that are of no further use to departments or individuals.

Inquiries should be addressed to: Professor A. H. Voisey, Department of Geology, The University of New England, Armidale, 5N, New South Wales.

PUBLICATIONS RECEIVED

- British Territories in Borneo: Geological Survey Department. Mem. 8, The Geology and Mineral Resources of the Upper Rajang and Adjacent Areas, Sarawak. By H. J. C. Kirk. pp. xv + 181, with 29 figs., 30 tables, 53 pls., and 4 coloured maps in folder. Kuching, Sarawak, 1957. Price 21s.
