

INTERNATIONAL JOURNAL OF

MICROWAVE AND WIRELESS TECHNOLOGIES**CONTENTS**

ACTIVE CIRCUITS

Optimization of spaceflight millimeter-wave impedance matching networks using laser trimming

K. Parow-Souchon, D. Cuadrado-Calle, S. Rea, M. Henry, M. Merritt, P. Hunyor, N. Brewster, L. Harman, C. Spindloe, P. Sykes, P. G. Huggard, B. Moyna and B. Ellison

1

PASSIVE COMPONENTS AND CIRCUITS

Signal distortions in circular dielectric waveguides at mm-wave frequencies

Andre Meyer and Martin Schneider

8

METAMATERIALS AND PHOTONIC BANDGAP STRUCTURES

Applications of metamaterial sensors: a review

Divya Prakash and Nisha Gupta

19

Eight-shaped polarization-dependent electromagnetic bandgap structure and its application as polarization reflector

Priyanka Dalal and Sanjeev Kumar Dhull

34

ELECTROMAGNETIC COMPATIBILITY

Analysis of the electromagnetic wave illumination on the transmission lines with nonlinear terminations

Z. Seifi, A. Ghorbani and A. Abdipour

43

ANTENNA DESIGN, MODELLING AND MEASUREMENTS

High isolation 4-element ACS-fed MIMO antenna with band notched feature for UWB communications

Ahmed A. Ibrahim and Wael A. E. Ali

54

Quad-Band multi-polarized antenna with modified electric-inductive-capacitive resonator

Ghanshyam Singh, Binod Kumar Kanaujia, Vijay Kumar Pandey and Sachin Kumar

65

Connected slots antenna array feeding a high-gain lens for wide-angle beam-steering applications

Imran Aziz, Erik Öjefors and Dragos Dancila

77

Graphene-based wide band semi-flexible array antenna with parasitic patch for smart wireless devices

Ronak Vashi, Trushit Upadhyaya and Arpan Desai

86

Theoretical and experimental investigation of two-layer circular patch antenna excited by a coaxial probe

Manotosh Biswas, Mihir Dam and Sourav Banik

95

Compact dual and triple band antennas for 5G-IOT applications

Ruchi, Amalendu Patnaik and M. V. Kartikeyan

115
