Oryx

The International Journal of Conservation

Published for Fauna & Flora International

Editor

Martin Fisher, Fauna & Flora International, UK

Oryx -- The International Journal of Conservation is a quarterly peer-reviewed journal of biodiversity conservation, conservation policy and sustainable use, and the interaction of these subjects with social, economic and political issues. The journal has a particular interest in material that has the potential to improve conservation management and practice, supports the publishing and communication aspirations of conservation researchers and practitioners worldwide and helps build capacity for conservation. Besides articles and short communications, Oryx regularly publishes reviews, forum sections and letters, and every issue includes comprehensive reporting of international conservation news.

JOURNALS

Journal of Tropical Ecology

Editor

Ian Turner, Winchelsea, UK

Journal of Tropical Ecology publishes papers in the important and now established field of the ecology of tropical regions, either arising from original research (experimental or descriptive) or forming significant reviews. First published in 1985, Journal of Tropical Ecology has become a major international ecological journal. With clear, stimulating and readable reports of recent research findings, the journal provides a platform for the dissemination of information on all aspects of tropical communities and ecosystems

JOURNALS

Journal of the Marine Biological Association of the United Kingdom

Published for the Marine Biological Association of the United Kingdom

Executive Editor

Dr. P. R. Dando, The Marine Biological Association of the UK, Plymouth, UK **Editor-in-Chief**

Dr. Ann L. Pulsford, The Marine Biological Association of the UK, Plymouth, UK

JMBA is an international journal, publishing original research on all aspects of marine biology. It includes pioneering work on major issues concerning marine organisms and their environment. Subjects covered include: ecological surveys and population studies of marine communities; physiology and experimental biology; taxonomy, morphology and life history of marine animals and plants; and chemical and physical oceanographic work.

Environmental Practice

Published for the National Association of Environmental Professionals

Editor

Tim Stretton, Saint Mary's University, Canada

Environmental Practice provides a multidisciplinary forum for authoritative discussion and analysis of issues of wide interest to the international community of environmental professionals, with the intent of developing innovative solutions to environmental problems for public policy implementation, professional practice, or both. Peerreviewed original research papers, environmental reviews, and commentaries, along with news articles and points of view, link findings in science and technology with issues of public policy, health, environmental quality, law, political economy, management, and the appropriate standards for expertise.

Environmental Conservation – Instructions for Authors

The main criteria for acceptance of submissions to Environmental Conservation are originality, scientific rigour, international interdisciplinary appeal to the readership and acceptability of style. Papers must not have been published previously, nor be under consideration for publication elsewhere. Environmental Conservation employs an interactive processing and editing procedure. We receive many more submissions than we have space to publish and the final authority in all matter relating to publication lies with

Submission of Manuscripts

All material to be considered for publication in Environmental Conservation must be submitted in electronic format via the journal's online submission system at the Journal's ScholarOne site at http://mc.manuscriptcentral.com/envcon. New authors and some such as the polaries of the polaries

sions of the following types are accepted for review in the Journal:

- Subject Reviews (<10 000 words including legends and references)
- Research Papers (<8000 words including legends and references)
- Reports (<4000 words including legends and references)
 Comments (<1500 words including any legends and references)

Articles received by the Journal will undergo a pre-screening process to increase the efficiency of the publication process. Papers that are considered to be of minor importance to the readership of the Journal are not reviewed and any papers with format problems are returned for revision. Papers selected for review are sent out to three referees, who agree to undertake the refereeing within a short period of time.

Licence and Permissions

Upon receipt of accepted manuscripts at Cambridge University Press authors will be invited to complete a copyright licence to publish form. The corresponding author is required to assign the copyright of any paper published to the Foundation for Environmental Conservation.

Work submitted for publication must be original, previously unpublished, and not under consideration for publication elsewhere. If previously published figures, tables, or parts of text are to be included, the copyright-holder's permission must have been obtained prior to submission. This must include the right to reproduce and publish electronically.

The author bears the responsibility for checking whether material submitted is subject to copyright or ownership rights, e.g. photographs, illustrations and data. Where use is so restricted, the Editors and the Publisher must be informed with the submission of the material.

Preparation of Manuscripts

Papers must be clearly written in English. A recent issue of the journal from Volume 38 onwards should be consulted for style. Units symbols and related matters are based on the CBE Manual Scientific Style and Format (6th Edition, 1994, ISBN 0-521-47154-0).

Text should be prepared in Word or rich-text format in a common 12-point front such as Arial. All pages should be numbered and should be line numbered to ease the review process. The first (title) page must include author names (capitals) and full addresses where the work was carried out. The corresponding author should provide an email address. Current addresses, where different, should also be given, and a word count (including references and legends) provided.

The second page of Research Papers, Reports and Subject Reviews requires a Summary that is concise and informative, succincity expressing the context, purpose, approach, findings and implications of the study. There should be no references or unexplained abbreviations. Avoid phrases such as 'are described', 'will be discussed', etc. Comments do not have a Summary, but please remember that all submissions require an additional Abstract at submission, which is used in the review process.

Research papers and Reports will normally have such sections as: Introduction; Methods; Results; Discussion; Acknowledgm References; and Figure Legends. The Methods section should include essential details of study area, analyses and sources of data. Each Table and Figure should be loaded as a separate file; format details are provided below.

A subject review should have sections appropriate to the topic addressed, but any methods (e.g. selection of sources, statistical analyses) should be detailed in a separate section.

Please note that footnotes are not used in the Environmental Conservation

Spelling and Language Editing

Before submitting your manuscript you may wish to have it edited for language, particularly if English is not your first language. Authors are liable for all costs associated with such services. Spelling should conform to *The Concise Oxford Dictionary*, 10th edition or later. Scientific names of genera, species and subspecies, but not of higher groups should be italicised. Foreign words should be italicized at their first mention, where they also must be defined and explained, but thereafter may be written in normal typeface.

The International System of units (SI) is to be used. Units, symbols and related matters are based on the CBE Manual Scientifich Style and Format (6th Edition, 1994, ISBN 0-521-47154-0). Acronyms and abbreviations are generally in upper case and should be expanded at the first mention. All currencies should at first mention have a US\$ exchange rate (e.g. '£1 = US\$1.20, January 2011).

All references to cited literature should be given in alphabetical order on a new page at the end of the paper. Where a Reference is not to a recognized periodical or substantive book, but rather to an official document, internal technical or consultancy report, greater flexibility may be exercised. The chief criterion for correct referencing is that a reader be provided with the information necessary to find the item cited. References should also be given to international treaties (UNTS number). Unnecessary refernecessary to mid the field tied. Acterietics should contain some or all of the following:

Author surrannes with initials (no spaces between initials)

Year of publication

- Title of paper (roman) or book (italic)
 Journal name (italic)
 Volume number (bold)
- · First and last page numbers

• van der Voet, E., Kleijn, R. & de Haes, U. (1996) Nitrogen pollution in the European Union - origin and proposed solutions

Fair meter voet, E., Sceliji, K. & et riaes, C. (1990) Mitogen ponution in the European Chionic Origin Environmental Conservation 23: 120-132.

In a book reference the edition, chapter(s), place of publication and name of publisher should be given:

- In a coors recently the culturi, chapter(s), piace of pulocation and name of publisher should be given: Myers, N. (1995) Tropical deforestation: population, poverty and biodiversity. In: The Economics and Ecology of Biodiversity Decline: the Pores Driving Global Change, ed. T.M. Swanson, pp. 111-22. Cambridge, UK: Cambridge University Press. Within the text citations are given by name of author and year of publication, for example:

 This has been observed elsewhere (Bloggs 2006; Smith 2008; Smith et al. 2009) or
- This phenomenon was first described by Smith and Bloggs (1992) after a previous study in the region by Clark et al. (1990) References to material available on the World Wide Web can be given only if the information is available on an official site and without charge to readers. The format for citations is as follows:
- Beckleheimer, J. (2010) How do you cite URLs in a bibliography? [WWW document]. URL http://www.nrlssc.navv.mil/

text. Do not use such terms as Op. cit. or Ibid.

onmental Conservation is pleased to announce that all figures submitted to the journal in colour will, where justified, be published in colour online at no cost. If you do not wish for your figures to be published online in colour, please submit your figures in in black & white All figures will be printed (i.e. hard copy) in black & white unless a fee is paid. Please make sure the figure legends are understandable for both the colour, and the black & white version of your figure. The maximum number of Figures will normally be four. Figures should be supplied in an electronic format at a suitable size for printing with the following resolutions:

Format: tif or eps Colour mode: black and white (also known as 1-bit)

Resolution: 1200 dpi

Combination artwork (line/tone)

Format: tif or eps

Colour mode: grayscale (also known as 8-bit) Resolution: 800 dpi

Black and white halftone artwork

Colour mode: grayscale (also known as 8-bit) Resolution: 300 dpi

Colour halftone artwork

Resolution: 300 dpi Figures should be referred to in the text and numbered consecutively (e.g. Fig. 1). They should be supplied separately from the Figures should not be framed and as simple as possible. Avoid fine lines, stippling and unusual symbols, which cannot be reproduced satisfactorily when reduced to one (84mm) or two-column width (175mm). Where various shadings are used within a figure please ensure that it is easy to differentiate between them. Line charts, bar charts and pie charts should be two-dimensional.

Labels on Figures should be brief and explained in the legend. Preferred symbols are open and filled circles, boxes and triangles, and these should be used consistently between Figures and as near as possible to 9 point when reproduced in the final journal.

Figure legends should be in a list separate from the Figures at the end of the main text. They should make the Figure comprerigure agents smoute on a last separate from the rigures at the end of the main text. They should make the rigure complete, hersible without reference to the main text. If abbreviations or symbols are used in the figures they should be explained in the figure legend, if they have not been explained in a key. Maps must have scales and photographs should include an indication of scale. Figures reproduced from other sources should be fully acknowledged in the legend, and permission for their reproduction in both written and electronic format should be sought before use.

Tables should be submitted in preferably MS Word or Excel format, and presented one per file, complete with heading. They should be uploaded separately from the main body of the text, with their approximate final positions indicated in the text. Tables should be suitable for production on a single journal page or less. Table captions should be brief and ensure the Table is comprehensible without reference to the text. They should incorporate any scale, key or symbols, etc. necessary to interpret the information. The maximum number of Tables will normally be four

Supplementary Material

There will normally be one of the following reasons for you to be supplying supplementary material to accompany the online

1. You wish to link to additional information which due to its nature does not lend itself to print media (examples-full data sets

1. 100 Wish to link to detail the advancement of the four and the formation from the original article in order to allow for space
2. The Editor of the Journal has requested that you extract certain information from the original article in order to allow for space

Onstantiants of the Pinth Celson.

3. You have requested additional material to be available to accompany an article that does not normally allow such material to be included (example – tables to accompany a correspondence article).

N.B. Please note that no copyediting or quality assurance measures will be undertaken on supplementary material (other than to ensure

that the file is intact). The authors therefore warrant that the supplementary material that they submit is in a suitable format for publicanner. The material shall be published online in exactly the form that it is supplied.

Please follow the following instructions to supply supplementary material to accompany the online version of your article

- Freese tonow the tonowing instructions to supply supplementary material to accompany the online version of your article.
 Each supplementary file must be supplied as a separate file. Do not supply this material as part of the file destined for publication in the print journal.
 Each supplementary file must have a clear title (eg, Supplementary Figure 1).
- Provide a text summary for each file of no more than 50 words. The summary should describe the contents of the file.

 Descriptions of individual figures or tables should be provided if these items are submitted as separate files. If a group of figures is submitted together in one file, the description should indicate how many figures are contained within the file and provide a general description of what the figures collectively show
- provide a general description of what the figures concerned show.

 The file type and file size in parentheses.

 Ensure that each piece of supplementary material is clearly referred to at least once in the print version of the paper at an appropriate point in the text, and is also listed at the end of the paper before the reference section.

Format and file size

- to man unit pressure

 File sizes should be as small as possible in order to ensure that users can download them quickly.

 Images should be a maximum size of 640 × 480 pixels at a resolution of 72 pixels per inch.

 Authors should limit the number of files to under ten, with a total size not normally exceeding 3 MB. Sound/movie files may Authors should limit the nature of mess to under ten, win a total size not normally executing 3 MD. Sound hower their may be up to 10 MB per file; colour PDFs/PowerPoint may be up to 5 MB per file; all other general file types may be up to 2 MB per file but most files should be much smaller.

 We accept files in any of the following formats (if in doubt please enquire first): MS Word document (.doc), Adobe Acrobat
- (pdf), Plain ASCII text (xx), Rich Text Format (xrt), WordPerfect document (wpd), HTML document (htm), MS Excel spreadsheet (xls), GIF image (gif), JPEG image (jpg), TIFF image (xif), MS PowerPoint slide (.ppt), QuickTime movie (.mov), Audio file (.wav), Audio file (.mp3), MPEG/MPG animation (.mpg)

If your file sizes exceed these limits or if you cannot submit in these formats, please seek advice from the editor handling your

Open Access Publication in Environmental Conservation

Cambridge Open Option allows authors the option to make their articles freely available to everyone, immediately on publication. This service reflects Cambridge's commitment to further the dissemination of published academic information.

ne allows authors to make their article freely available in exchange for a one-off charge paid either by the authors selves or by their associated funding body. This fee covers the costs associated with the publication process from peer review. intenserves or by time associated numing body. This covers are covers in covers associated with in the published article online. Payment of this one-off fee entitles permanent archiving both by Cambridge University Press and by the author; however, it also enables anyone else to view, search and download an article for personal and non-commercial use. The only condition for this is that the author and original source are properly acknowledged.

The Cambridge Open Option is only offered to authors upon acceptance of an article for publication and as such has no influence on the peer review or acceptance procedure. The paper will continue to be made available in both print and online versions, but will be made freely available to anyone with Internet links via our online platform, Cambridge Journals Online. In addition, such papers will have copyright assigned under a Creative Commons Attribution licence, which enables sharing and adjation, providing attribution is given. All articles will continue to be handled in the normal manner with peer-review, professional production and online distribution in Cambridge Journals Online. Articles will also be included in the relevant Abstracting & Indexing services and in CrossRef, and can have supplementary content (text, video or audio) added to their online versions. Cambridge will also deposit the article in any relevant repositories on the author's behalf, where that is a condition of the funding body.

The Cambridge Open Option is now available to authors of articles in Environmental Conservation at the standard Cambridge rate of £1695/\$2700 per article. Requests to take up the Cambridge Open Option will be subject to approval by the Editors of the Journal. For more information on Open Access and Cambridge Journals, please follow this link.

Required Statements

Acknowledgements

You may acknowledge individuals or organisations that provided advice, support (non-financial). Formal financial support and funding should be listed in the following section.

Please provide details of the sources of financial support for all authors, including grant numbers. For example, "This work was supported by the Medicial research Council (grant number XXXXXXXX)". Multiple grant numbers should be separated by a comma and space, and where research was funded by more than one agency the different agencies should be separated by a semi-colon, with "and" before the final funder. Grants held by different authors should be identified as belonging to individual authors by the authors' initials. For example, "This work was supported by the Wellcome Trust (A.B., grant number XXXX, YYYY), (C.D., grant number ZZZZ), the Natural Environment Research Council (E.F., grant number FFFF); and the National Institutes of Health (A.B., grant number GGG), (E.F., grant number HHHH)." Where no specific funding has been provided for research, please provide the following statement: "This research received no specific grant from any funding agency, rcial or not-for-profit sectors

Conflict of interest

Please provide details of all known financial, professional and personal relationships with the potential to bias the work. Where no known conflicts of interest exist, please include the following statement: "None."

Ethical standards

Where research involves human and/or animal experimentation, the following statements should be included (as applicable): The authors assert that all procedures contributing to this work comply with the ethical standards of the relevant national and institutional committees on human experimentation and with the Helsinki Declaration of 1975, as revised in 2008." and "The authors assert that all procedures contributing to this work comply with the ethical standards of the relevant national and institutional guides on the care and use of laboratory animals."

Tracking Your Submission

Your paper will be acknowledged by email on receipt. A reference number will be allocated which you should use in all corre spondence and for tracking an electronic submission on ScholarOne. All submissions approved for peer review are seen by at leas ons approved for peer review are seen by at least two reviewers. The journal makes every effort to ensure that reviewers report swiftly

As soon as the Editor has reached a decision on your paper you will be notified by e-mail. Appeals on any decisions made by the Editors must be made within a month of the decision. Authors of papers supported by reviews can expect normally to have their paper returned to them, with comments of both reviewers and Editor. The revised manuscript should be submitted as directed with an accompanying letter detailing how substantive points raised have been addressed.

After acceptance, the copy-editor and publisher deal with all matters relating to printing. Proofs and offprint order forms will be sent to corresponding authors. If authors are to be away from their correspondence address during the ten weeks after acceptance, they must have arrangements in place for queries from the copyeditor to be addressed promptly, and the proofs to be carefully read and swiftly returned.

Please address any further queries concerning publication to Professor N.V.C. Polunin.
