

ANIMAL PRODUCTION

JOURNAL OF THE BRITISH SOCIETY OF ANIMAL PRODUCTION

OLIVER & BOYD LTD.
EDINBURGH AND LONDON

JUNE 1962

VOL. 4 PART 2

INFORMATION FOR CONTRIBUTORS TO *ANIMAL PRODUCTION*

Animal Production publishes papers on original research provided that they have not been, and will not be, published elsewhere in whole, or in part, without the Editors' written permission. Contributions may be in the field of animal production, or in any related scientific field. Papers presented at meetings of the British Society of Animal Production, if submitted to the Editors, will be given equal consideration with other papers.

Manuscripts should be typed in double spacing and the ribbon copy sent to
Dr. Gerald Wiener,
A.R.C. Animal Breeding Research Organisation,
6 South Oswald Road, Edinburgh 9.

Manuscripts are not returned with the proofs; authors should therefore retain copies.

Length of papers should not normally exceed the equivalent of 6,000 words, inclusive of tables, text figures and references.

Illustrations (figures and plates) should be simple and few, otherwise a charge may have to be made to authors. Legends should be typed on a separate sheet.

- (a) Diagrams should be drawn in Indian ink, about twice the size of the finished block, on Bristol board or stout tracing paper. Photographed diagrams are also accepted. Lettering inside the framework of the diagram should be inserted in Indian ink. Marginal lettering may, if preferred, be inserted lightly in pencil. Costs of touching-up diagrams found to be incomplete or unsuitable for line-block reproduction will be charged to authors.
- (b) Photographs intended for half-tone reproduction should be on glossy paper. They will be accepted only if found necessary by the Editors. Part of their cost may have to be borne by authors.
- (c) Colour plates will not be accepted unless the author bears the cost.

Tables should be as simple and as few as possible; if they are very large or numerous a charge may have to be made to authors.

A completely new and comprehensive review of progress in the artificial insemination of farm livestock, poultry, dogs and laboratory animals.

TECHNICAL COMMUNICATION NO. 15

THE SEMEN OF ANIMALS AND
ARTIFICIAL INSEMINATION

Edited by J. P. Maule

Part I: Cattle, by D. R. Melrose

Part II: Water buffalo, by P. Bhattacharya
Sheep, by C. W. Emmens and T. J. Robinson
Goat, by J. Blokhuis
Pig, by L. E. A. Rowson
Horse, by P. W. Swire
Mule production, by P. W. Swire
Dog, by A. E. Harrop
Rodents, by C. E. Adams
Poultry, by P. E. Lake

Part III: Artificial insemination in the tropics, by D. H. L.
Rollinson and W. R. Nunn
Transport of semen, by G. F. Smith

Among the subjects covered are: the management of sires for semen production; methods of semen collection; assessment of semen quality; semen composition and metabolism; the dilution, handling, storage and transport of semen; insemination techniques; factors affecting conception rates.

INDIAN JOURNAL OF VETERINARY SCIENCE AND ANIMAL HUSBANDRY

Indian Journal of Veterinary Science and Animal Husbandry, a quarterly journal, was established about thirty-one years ago. It is the leading Indian veterinary journal and includes results of original research on diseases, breeding, nutrition and husbandry of farm animals; and reference to almost all important work in veterinary science.

Annual subscription
15s.

INDIAN JOURNAL OF AGRICULTURAL AND VETERINARY EDUCATION

A half-yearly periodical published with a view to promoting agricultural and veterinary education in the country. Scientific papers and instructive articles on different aspects of agricultural and veterinary education presented in this journal are of great practical use to educationists, research scholars, students, etc. Contributors to this journal are renowned specialists from India and abroad.

Rabbit Feeding for Meat and Fur

BY

F. C. AITKEN AND W. KING WILSON

*Technical Communication No. 12, 2nd Edition, of the
 Commonwealth Bureau of Animal Nutrition*

The second edition of this book has been completely rewritten to bring it up to date. In the first half rations recommended in Scandinavia, the United Kingdom and the United States for breeding and rearing rabbits are presented in detail, evaluated and discussed. In the second half the available information on nutrient requirements of rabbits is reviewed. An appendix gives crude composition, percentage of digestible nutrients and energy of digested feed of some rabbit feeds in common use.
