

VOLUME 107 SUPPLEMENT 1993

# Parasitology

*Supplement to Parasitology 1993*

**Human nutrition and parasitic infection**

EDITED BY **D. W. T. CROMPTON**

CO-ORDINATING EDITOR **L. H. CHAPPELL**

CAMBRIDGE UNIVERSITY PRESS

**Subscriptions** may be sent to any bookseller or subscription agent or direct to the publisher: Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU. Subscriptions in the USA, Canada and Mexico should be sent to Cambridge University Press, Journals Department, 40 West 20th Street, New York, NY 10011-4211. All orders must be accompanied by payment. The subscription price of volumes 106 and 107, 1993 is £225 (US \$440 in the USA, Canada and Mexico), payable in advance, for ten parts plus supplements; separate parts cost £20 or US \$40 each (plus postage). Japanese prices for institutions (including ASP delivery) are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo. Second class postage paid at New York, NY and at additional mailing offices. POSTMASTER: send address changes in USA, Canada and Mexico to *Parasitology*, Cambridge University Press, 110 Midland Avenue, Port Chester, New York, NY 10573-9864.

## Human nutrition and parasitic infection

EDITED BY

D. W. T. CROMPTON

**CAMBRIDGE**  
**UNIVERSITY PRESS**

# Contents

<i>Preface</i>	S1	Clinical features and definitions of acute and persistent diarrhoea and dysentery	S37
<i>List of contributions</i>	S3	Enteric pathogens in diarrhoeal diseases	S38
<i>Foreword</i>	S5	Pathogenesis of Diarrhoea	S38
<b>Human nutrition needs and parasitic infections</b>	S7	Interventions for reducing mortality/morbidity amongst under-fives from diarrhoeal diseases	S39
Introduction	S7	Case management	S40
Human energy requirements	S7	Appropriate feeding	S40
Proteins	S9	Chemotherapy	S41
Proportions of major energy sources in the diet	S11	Increasing host resistance	S42
Micronutrients	S16	Measles immunization	S42
References	S17	Rotavirus immunization	S42
		<i>Shigella</i> spp. and ETEC	S42
		Cholera immunization	S43
		Reducing transmission of pathogens	S43
<b>Pathways to the impairment of human nutritional status by gastrointestinal pathogens</b>	S19	Experiences from Sierra Leone	S43
Summary	S19	Diarrhoeal disease-associated morbidity and mortality in children under five years of age in Freetown, Sierra Leone	S43
Introduction	S19	Case management in Sierra Leone	S45
The nature of human nutritional status and its assessment	S20	Increasing host resistance in Sierra Leone	S46
The nutrients	S20	Reducing transmission of pathogens in Sierra Leone	S47
Nutritional status and nutrient deficiency	S20	Identification of epidemics and implementation of control in Sierra Leone	S48
Nutrient requirements and recommendations	S21	Conclusion	S48
The interaction of nutrition and infection	S22	Acknowledgements	S48
Epidemiology of diarrhoeal illness and intestinal parasitosis	S23	References	S48
Diarrhoea in infants and young children	S23		
Intestinal parasitism in the population	S23	<b>Nutrition support and the human immunodeficiency virus (HIV)</b>	S53
Diarrhoea and parasitism in immunocompromised hosts	S23	Summary	S53
Mechanisms of nutrient loss and malnutrition in intestinal infections	S24	Introduction	S53
Maldigestion	S24	Clinical symptomatology	S54
Malabsorption	S24	Relationship of malnutrition and disease	S55
Excessive wastage	S24	Prevalence	S55
Intestinal pathogens associated with nutrient loss	S25	Hospital	S55
Viruses	S25	Outpatient	S56
Bacterial pathogens	S25	Predicting death	S56
Protozoal pathogens	S26	Malnutrition	S56
Helminthic pathogens	S28	Body composition	S56
Conclusion	S30	Energy expenditure in AIDS	S57
References	S30	Energy expenditure: pre-AIDS to AIDS	S58
		Substrate utilization	S59
<b>Diarrhoeal disease in early childhood: experiences from Sierra Leone</b>	S37	Lipid metabolism and cytokines	S60
Summary	S37	Selecting the optimal diet	S60
Introduction	S37	Nutrition assessment and requirements	S61
		Oral diet	S62
		Tube feeding diets	S63
		Parenteral nutrition	S64

Topics for future research	S65	<b>Malarial parasites and antioxidant nutrients</b>	S95
References	S65	Summary	S95
<b>Resistance to intestinal parasites during murine AIDS: role of alcohol and nutrition in immune dysfunction</b>	S69	Introduction	S95
Summary	S69	Dietary pro-oxidant/antioxidant balance of the host and the antimalarial efficacy of qinghaosu	S95
Introduction	S69	Vitamin E status and the development of murine malaria	S97
LP-BM5 murine leukemia virus, a murine model of retrovirus disease (AIDS)	S69	Peroxidizability of dietary fat and development of malaria	S98
<i>Cryptosporidium</i>	S70	Vitamin C status and development of malaria	S99
<i>Giardia</i>	S71	Riboflavin status and development of malaria	S100
Cytokine modification by alcohol and retrovirus: effects on intestinal immunity	S72	Oxidative stress and development of malaria	S100
Nutrition and intestinal resistance	S73	Concluding remarks	S102
Conclusion	S73	References	S103
Acknowledgements	S73	<b>The impact of schistosomiasis on human nutrition</b>	S107
References	S73	Summary	S107
<b>Food-borne bacterial infections</b>	S75	Introduction	S107
Summary	S75	Nutritional outcomes and functional significance	S107
Introduction	S75	<i>Schistosoma haematobium</i> and malnutrition	S109
The incidence of food poisoning	S75	Blood and iron loss in urine	S109
<i>Campylobacter</i>	S76	Haemoglobin levels, anaemia, splenomegaly and hepatomegaly	S111
Clinical features	S77	Proteinuria and daily protein loss	S112
Treatment	S78	Child growth and adult protein-energy status	S112
The bacteria	S78	Physical fitness, physical activity and appetite	S114
Genetics of campylobacters	S79	<i>Schistosoma mansoni</i> and malnutrition	S115
Natural habitat of campylobacter	S79	Community studies of <i>S. mansoni</i>	S116
The source of human infections	S80	<i>Schistosoma japonicum</i> and malnutrition	S117
<i>Salmonella</i>	S81	Clinical studies of <i>S. japonicum</i>	S117
The diseases	S81	Field studies of <i>S. japonicum</i>	S117
<i>Salmonella enteritidis</i>	S82	Conclusions and recommendations	S119
Infective dose of salmonella	S83	References	S120
<i>E. coli</i> O157 and <i>Listeria monocytogenes</i>	S83	<b>Ascariasis and childhood malnutrition</b>	S125
<i>E. coli</i> O157 (VTEC)	S83	Summary	S125
The toxin	S84	Introduction	S125
The source	S84	Morphology	S125
Control of ETEC	S84	Life history	S125
<i>Listeria monocytogenes</i>	S84	Epidemiology	S125
Introduction	S84	Population biology	S126
<i>Listeria</i> : microbiology	S85	Study country and population	S126
Listeriosis: the disease	S85	Study design	S126
The source	S85	Study method	S127
The incidence of the disease in the UK	S86	Parasitological examinations	S127
<i>Listeria</i> pathogenesis and virulence factors	S86	Nutritional, biochemical and clinical examinations	S127
Infective dose	S87	Intervention	S127
The food industry – the problems	S88	Duration of study	S127
(a) <i>L. monocytogenes</i> : its thermotolerance	S88	Analysis	S128
(b) Contamination after cooking	S88	Results	S130
(c) Multiplication of the bacteria during storage	S88	Physical growth	S130
(d) Recovery of heat-damaged bacteria	S88		
(e) Growth of <i>L. monocytogenes</i> at low temperatures	S89		
Comment	S89		
Acknowledgements	S90		
References	S90		

Non-intervention studies	S130	<b>Energy requirements in human pregnancy, in human nutrition and parasitic infection</b>	S169
Non-randomized intervention studies	S130	Summary	S169
Randomized intervention studies	S130	Introduction	S169
Lactose tolerance	S130	Energy cost of pregnancy	S169
Vitamins and protein	S130	Energy intakes	S171
Discussion	S133	Possibility of energy savings	S173
Acknowledgements	S134	The influence of parasitic infection	S173
References	S134	Conclusion	S174
<b>Hookworm infections and human iron metabolism</b>	S137	Acknowledgement	S174
Summary	S137	References	S174
Introduction	S137	<b>Nutritional and physiological consequences of tumour glycolysis</b>	S177
Life history of hookworms	S138	Summary	S177
Epidemiology of hookworm infections	S138	Introduction	S177
Human iron status and anaemia	S139	Glycolysis in tumour cells	S177
Hookworm feeding activity and human blood loss	S141	Changes in enzyme and metabolite patterns	S178
A provisional model for hookworm anaemia	S142	Enhanced glucose uptake	S178
References	S144	Lack of a Pasteur effect and mitochondrial content	S178
<b>Filariasis: nutritional interactions in human and animal hosts</b>	S147	Modulation of tumour glycolysis by ATP	S178
Summary	S147	Activity of the NADH shuttles	S179
Introduction	S147	Role of lactate transport	S179
Effect of human infections on growth and mortality	S149	Other pathways of glucose metabolism: the glycolytic bypass	S179
Studies on experimental rodent filariasis	S150	Other sources of lactate	S179
Onchocerciasis, vitamin A and experimental filariasis	S151	Role and regulation of glycolysis and the parasitic nature of tumour cells	S179
Other deficiencies	S153	Gluconeogenesis in the host	S180
Conclusions	S155	Mechanisms of the gluconeogenic increase	S181
References	S156	Gluconeogenesis and cancer cachexia	S181
<b>Parasitic infection and chronic energy deficiency in adults</b>	S159	Approaches to treatment using the glucose/lactate cycle	S181
Introduction	S159	Hexose analogue glycolytic inhibitors	S181
Defining chronic undernutrition in adults	S160	Lactate transport inhibitors	S181
Morbidity and mortality in adult undernutrition	S160	Inhibitors of host gluconeogenesis	S181
Parasitic infections and adult undernutrition: associations and consequences	S161	Nutritional manipulations	S182
Adult malnutrition – a causative factor in parasitic infections?	S161	Carbohydrate deprivation	S182
Parasitic infections – a causative factor in adult malnutrition?	S161	Hyperalimentation	S182
Adult malnutrition, parasitic infections and work productivity	S163	Summary of Cori cycle-based cancer treatments	S182
Nutritional repletion and reactivation of parasitic infection in malnourished adults	S164	Summary: tumours as glycolytic parasites	S182
Alteration in pharmacodynamics of drugs in adult malnutrition	S164	References	S183
Conclusions	S165	<b>Infection, nutrition and cognitive performance in children</b>	S187
Acknowledgements	S165	Summary	S187
References	S165	Introduction	S187
		Intelligence, cognition and mental processes	S187
		Cognition and intelligence	S187
		Information processing	S188
		IQ and DQ	S189
		Malnutrition, development and psychological function	S190
		Undernutrition – PEM	S190
		Correlational studies	S190
		Intervention studies	S190

Iron deficiency	S191	Models and measures	S196
Conclusions: malnutrition and cognitive function	S192	References	S197
Infection and cognitive performance	S193	<b>Summary and recommendations</b>	S201
Parasites, behaviour and cognitive performance	S193	References	S202
Causal connections: and a speculative hypothesis	S194
