Subject Index

A-genus, 129, 149, 154, 160
a-T-amenable group, 304–306
a-T-menable group, 308
A-theory (Waldhausen), 174, 184, 249
  see also assembly map
α-approximation theorem (Chapman–Ferry), 96, 97, 106, 109, 120, 122, 124, 165
acyclic group, 25
acyclic universal group, 30
Alexander trick, 122
algebraic K-theory, 80, 86, 121, 136, 164, 166, 170, 173, 187, 200, 201, 218, 253, 266, 288, 293
algebraic Poincaré complex (= chain complex)
  cobordism of, 121
    relation to L-theory, 104
  controlled, 119
almost-flat bundle, 151, 179
almost-flat manifold, 294
almost-invariant vector, 49
amenability, 48, 49, 75, 76
  Property (T), 50
amenable group, 49, 50, 52, 53
  discrete, 51
analogy, ix, 134, 138, 177
Andreev's theorem, 29
Anosov (as an adjective), 298
ANR (= absolute neighborhood retract), 99
antistructure, change of, 288
approximate fibration, 6, 164, 275, 278–282, 289, 303
approximate Poincaré complex, 164
Arf invariant, 104
arithmetic group, 32, 43, 59, 67, 74
arithmetic lattice, 14
arithmetic manifold, 19, 59
aspherical, 5, 10, 13, 20–27, 70
  equivariant aspherical space, 202, 210, 231
aspherical object in a geometric category, 107
assembly map, 105, 112, 137, 138, 151, 153, 163, 168, 173, 200, 215, 220, 221, 225, 232, 233, 235, 255, 266
  twisted assembly (= assembly with coefficents), 181
  twisted assembly (= assembly with coefficients), 281, 304, 307
asterisk, 34
asymptotic transfer, 298
Atiyah's theorem, 39, 72
Atiyah–Bott–Milnor theorem, 80, 81
Atiyah–Hirzebruch theorem on circle actions, 129, 136
  see also Schultz conjecture
Atiyah–Kodaira bundle, 91–93, 159, 264
Atiyah–Lichnerowicz–Singer theorem on positive scalar curvature, 132
Atiyah–Patodi–Singer theorem, 80
  η-invariant, 117, 118
    homotopy invariance of, 118, 125
    homotopy invariance of the Cheeger–Gromov analogue, 126
    homotopy noninvariance of this invariant, 127
Atiyah–Schmid and the L^2-index theorem, 77
Atiyah–Singer index theorem, 82, 83, 120, 134
  for families, 86, 90, 91, 136
  G-index theorem, 116, 136
Aut, 186
automorphisms of an aspherical manifold, 267

bad end, 160
Baily–Borel compactification, 72
based chain complex, 171

https://doi.org/10.1017/9781316529645.011 Published online by Cambridge University Press

Bass conjecture, 146
Bass–Heller–Swan theorem, 88, 120, 173, 201, 294
Bass–Serre tree, 13
Baum–Connes conjecture, 19, 31, 125, 137, 147, 169, 291, 297, 302–309
  counterexamples to, 306, 309
  for a-T-amenable groups, *see* Higson–Kasparov theorem
  for hyperbolic groups, 169, 262
  with coefficients, 141, 170
Baum–Fulton–MacPherson Riemann–Roch theorem, 159
Baumslag–Dyer–Heller construction, 25
Bieberbach theorem, 1, 4
Bieri–Eckmann duality group, 72
birational equivalence, 160
birational invariance, 159, 160
block automorphism, 190, 246, 269
block bundle, 6, 155, 165, 187, 190
blocked surgery, 104, 165, 166
Bochner formula, 132, 149
Borel conjecture, 4, 79, 84, 89, 117, 118, 138, 163, 164, 173–176, 187, 199, 202, 233, 247, 258, 261, 263, 268, 271, 278, 287, 291
  and algebraic K-theory, 166
  and the assembly map, 165
  assembly map, 105
  bounded, 108, 124, 306
    counterexample, 108, 124
  counterexample, 119
  for almost-flat manifolds, 294
  for flat manifolds, 294
  for hyperbolic groups, 174, 262
  for non-positively curved manifolds, 296
  for poly-$\mathbb{Z}$ generalizations, 294
  for the torus, 88, 96, 101, 123, 292
  for torsion-free groups, 102, 118
  isovariant, 199, 206, 211, 237
  proper, 39, 45, 65–70, 168, 199
  supernormal spaces, 216
  twisted, 168
    see also assembly map (= assembly with coefficients)
  see also equivariant Borel conjecture
Borel construction, 224, 250
Borel game, 137, 163
Borel package, 120, 146, 166, 167, 266, 272, 274, 282, 300
Borel subgroup, 36, 37
Borel theorem on group actions, 283, 286
  Avramidi's extension to non-uniform lattices, 286
  partial extension to essential manifolds, 284
Borel theorem on the stable cohomology of lattices, 74
Borel–Harish-Chandra theorem, 14
Borel–Serre compactification, 13, 32, 37, 71, 72
Borisov–Libgober theorem, *see* higher elliptic genus
Borromean rings (and phenomena), 245, 248
Bott element, 151
Bott periodicity, 65, 135, 151, 230
  and functoriality of K-theory, 100
  equivariant, 175
boundary convention, 200
boundary of a discrete set, 49
bounded category, 107, 287
bounded cohomology, 2, 8
bounded generation, 76
bounded geometry, 142, 179, 306, 309
bounded propagation speed, 152
branched cover, 23
Brauer induction, 294
Browder product theorem, 238
Browder's theorem (comparing equivariant and isovariant homotopy equivalence, 238
Browder–Levine fibering theorem, 87, 277
Browder–Livesay theory, 275, 288
Browder–Novikov theorem, 73, 79
Browder–Quinn L-group (or surgery), *see* stratified L-group (stratified structures)
Brown–Douglas–Fillmore theory, 135
Bryant–Ferry–Mio–Weinberger (BFMW) classification of homology manifolds, 123
BSF, 40, 41
BSO, 40, 65
Burnside problem, 29

C^*-algebra, 124, 136, 137, 139, 140, 145, 152, 163, 164, 168, 175
  maximal, 137
  reduced, 137
  see also noncommutative geometry
$C_r^*\pi$, 137, 178, 302
$C_{\max}^*\pi$, 137, 178, 234, 302
C_{red}^*, 169
Cannon conjecture, 261
  in high dimension, 262
Cannon–Edwards theorem, 214
  see also double suspension theorem
