

INDEX OF SUBJECTS

	PAGE
Acetyl-methyl-carbinol, detection of	521
Aerosols, effect of humidity on	117
investigation of	473
Air, disinfection by aerosols	117
purification by hypochlorous acid gas	44
Air-borne bacteria, slit-sampler for collecting	197
Animals, laboratory, new	131
Anthracite dust, intra-tracheal inoculation of	101
Avian type of <i>M. tuberculosis</i> , in cattle	290
susceptibility of snake to	284
<i>Bacillus anthracis</i> , longevity of spores of	496
Bactericidal action of neutrons	1
radioactive radiations	1
X-rays	1
<i>Bacterium dysenteriae</i> Sonne, study of	105
<i>paratyphosum</i> C, anaerogenic form of	39
B.C.G., survival in goats	260
Bed-bug, ecology of	347
Calmette-Guérin strain of <i>B. tuberculosis</i> in goats	266
<i>Cymex lectularius</i> L., ecology of	347
Coliform bacteria, in fresh water	17
modified Eijkman method applied to	566
papillary variants in	497
presumptive tests for	180
significance of degree of pollution by	139
Colonies of <i>Bact. dysenteriae</i> Sonne	105
Dust, anthracite, intra-tracheal inoculation of	101
Eijkman test, modified	566
Field vole and tubercle bacilli	250, 260
Fresh water, bacteriology of	17
Germicidal aerosols	117
Germicidal smokes, investigation of	473
Glandular fever, serological diagnosis of	330
Goats, survival of B.C.G. in	266
Golden hamster and tubercle bacilli	260

	PAGE
Haemolytic streptococci, types in scarlet fever	65
Hamster and tubercle bacilli	260
Hedgehogs as laboratory animals	131
'Hospital infection'	320
Hypochlorous acid gas, air purification by	44
'Infection, hospital'	320
Infectious diseases in a semi-closed community	570
Infectious mononucleosis, serological diagnosis of	330
Johne's disease, testing for	297
Laboratory animals, new	131
Lakes, bacteriology of	17
Milk-spread epidemic of scarlet fever	543
Mononucleosis, infectious, serological diagnosis of	330
Mortality, occupational risk in pulmonary tuberculosis	462
<i>Mycobacterium tuberculosis</i> , history of six old cultures	530
<i>Mycobacterium tuberculosis avium</i> in cattle	290
in snakes	284
Neurotropic strain of vaccinia virus in sheep	509
Neutrons, bactericidal action of	1
Occupational risk in mortality in pulmonary tuberculosis	463
Papillary variation in coliform bacteria	497
Paratyphoid B fever, an outbreak of	553
Physiology, human, under high pressure	225
Plasma, freezing of	489
spin-freezing of	111
Pneumoconiosis, physical type of	169
Pressure, high, physiology under	225
Radioactive radiations, bactericidal action of	1
Scarlatina, haemolytic streptococci in	65
Scarlet fever, a milk-spread epidemic of	543
Semi-closed community, infectious diseases in	570
Serological types of haemolytic streptococci	65
Serum, freezing of	489
spin-freezing of	111
Sheep, vaccinia virus in	509
Spin-freezing of serum and plasma	111
Smokes, germicidal, investigation of	473
Snake, susceptibility to avian tubercle bacilli	284
Spores of <i>B. anthracis</i> , longevity of	496
Streams, bacteriology of	7
Streptococci, haemolytic, serological diagnosis of	65

Index of Subjects

621

	PAGE
Tubercle bacilli, atypical strains	272
history of six old cultures of	330
in cattle	290
field voles	250, 260
hamster	260
snake	284
toad	289
inoculation with dust	101
preservation of	289
Tuberculosis, pulmonary, occupational risk in mortality	463
Vaccinia virus, experiments in sheep	509
Water, fresh, bacteriology of	17
X-rays, bactericidal action of	1
