Signed and sealed by me this * day of 19

Signature In the presence of Occupation

(signature of witness, who should not be your spouse)

Address

* The first payment must be received within 1 year from this date.

Ecological Research

Edited by
Masayuki Yasuno
and an
international
Editorial Board
ISSN 0912-8314
Published three
times a year

Established in 1986, *Ecological Research* is the official journal of The Ecological Society of Japan and is published in English in order to promote internationally the results of pure or applied research in ecology.

The journal has grown in size and stature over the last six years in response to the need for a broadly based ecology journal with an international outlook and with the appointment of a distinguished international editorial advisory board, the development of *Ecological Research* has seen an increase in circulation and authorship from outside Japan.

The journal publishes original research papers in all branches of ecology: aquatic, terrestrial, marine, theoretical or applied with a balance between animal and plant studies. Short communications are also featured in the journal.

Ecological Research is published three times in April, August and December. The subscription prices for 1993 are ¥13,500 (Japan) or A\$169.00 (Australasia)/US\$130.00/UK£94.00 and A\$169.00 (overseas). The journal is dispatched by surface air-lifted post from Singapore.

Ecological Research is covered by *Current Contents/Life Sciences* and *Current Contents/Agriculture, Biology and Environmental Sciences*.

Notes for contributors

General *Oryx* publishes original articles and reports dealing with the conservation of species and habitats world-wide, with particular emphasis on those that are endangered. All submissions are reviewed by at least two referees. It is helpful if authors suggest at least one referee who is qualified to judge the work objectively.

Submissions should be sent to the Editor, FFPS, 1 Kensington Gore, London SW7 2AR.

After acceptance papers may be edited to enhance clarity. Where major changes have been made edited manuscripts are returned to authors before type-setting. Page proofs are sent to all authors for approval before going to press. Contributors receive two free copies of the journal and will be entitled to buy additional copies at £2.00 each, post free. Offprints may be ordered at cost price.

Contributions should be concise but informative, normally in English. Articles should be as short as possible, preferably under 2500 words, and very short articles are acceptable.

Manuscripts should be typed on one side only and double-spaced on A4 paper (208x298 mm). The left-hand margin must be at least 40 mm wide. Two copies should be submitted and authors are also invited to submit papers on disk (IBM compatible or Apple format).

Footnotes should be avoided but, if necessary, should be indicated with asterisks in the text. The author's name and postal address should follow any acknowledgments and references at the end of the article.

References in the text should give the author's name with the year of publication in parentheses. The reference list should be in alphabetical

order and include the full article title.

References should be given according to the abbreviations in the *World List of Scientific Periodicals*. Thus:

Aveling, C. and Harcourt, A.H. 1984. A census of the Virunga gorillas. *Oryx*, **18**, 8–13.

Hartshorn, M.G. 1983. Wildlife conservation in Central America. In *Tropical Rain Forest: Ecology and Management* (eds S. L. Sutton, T. C. Whitmore and A. C. Chadwick), pp. 421–423. Blackwell Scientific Publications, Oxford.

Illustrations are welcomed and ideally should be glossy, black-and-white whole-plate prints. Good colour slides are acceptable if black-and-white photographs are not available.

Line drawings and maps should be in black ink on strong white or translucent paper. Lettering on maps and figures should be sent on a separate copy of the figure along with the unlabelled original.

Captions for figures should be typed consecutively on a separate sheet.

Tables. Each table should be self-explanatory and typed on a separate sheet with an appropriate caption.

Scientific names should be underlined and not placed in parentheses. Species' names should follow a checklist, which should be mentioned in a covering letter where there is a risk of confusion.

The first time a species is mentioned its scientific name should be given. English names should be in lower case throughout except where they incorporate a proper name.
