

Biophysical Discussions

FIRST BOOK OF A SERIES

Fast Biochemical Reactions in Solutions, Membranes, and Cells

Proceedings of a Meeting sponsored by
the Biophysical Society

2-5 April 1978 at Airlie, Virginia

18 Research Papers with Discussion
43 Extended Abstracts

400 pages, *hard-covered book*, 7 x 10, 100 graphs and illustrations, fully indexed. \$25.

Order from: The Rockefeller University Press, Order Service, 1230 York Avenue, New York 10021 U.S.A.

INFORMATION FOR CONTRIBUTORS TO QUARTERLY REVIEWS OF BIOPHYSICS

1. *Quarterly Reviews of Biophysics* is the official journal of the International Union for Pure and Applied Biophysics. As such, its primary aim is to provide a forum for general and specialized communication between biophysicists working in different areas. This will normally be achieved by inviting authors who have made significant contributions to give a critical and readable account of recent progress in their special fields. Shorter and even controversial articles discussing topics of particular current interest will also be published.

2. Reviews should preferably be written in English. The style of presentation must be concise, with only key references.

3. Three copies of manuscripts are required. They should be typed in double spacing with a margin of 4 cm all round. The position of tables and illustrations should be indicated in the text. Tables and legends for illustrations should be typed on separate pages. A table of contents should be provided for printing at the head of the article.

4. In the text, the references should be to authors and year. When a paper cited has three or more authors the style Smith *et al.* (1973) should be used on all occasions. At the end of the paper, references should be listed alphabetically, with the full title of each paper, and the first and last pages. Abbreviations of journal titles should follow the latest edition of the *World List of Scientific Periodicals*. For example

BERNAL, J. D. (1967). *Origin of Life*. London: Weidenfeld and Nicolson.

EIGEN, M. (1968). New looks and outlooks on physical enzymology. *Q. Rev. Biophys.* 1, 3-33.

5. Drawings should be in Indian ink on tracing paper. They should be drawn roughly twice the size of the finished block. Explanations should as far as possible be placed in the legends. Lettering for photographs should either be on a duplicate print or on an accurately registered overlay.

6. The author will receive only one set of page proofs for correction. Fifty reprints of each review will be provided free of charge. Additional copies may be purchased.

QUARTERLY REVIEWS OF BIOPHYSICS

Reviews on the following topics will appear in forthcoming issues:

Structures and mechanisms of DNA restriction and
modification enzymes

PAUL MODRICH

The molecular structure of adrenergic and dopaminergic
substances

JOHAN GIESECKE and HANS HEBERT

Voltage clamp and tracer flux data: effects of a
restricted extra-cellular space

DAVID ATTWELL, DAVID EISNER and IRA COHEN

Calcium movement in nerve fibers

J. REQUENA and L. J. MULLINS
