

SOUTH WEST CHARTERING

continuing to specialize in Polar Chartering
Over 40 years providing ice-strengthened ships for expeditions to the Arctic and
Antarctic — for charter — for purchase
Our service includes all other types of survey vessels

Contact: Polar Department, South West Chartering (UK) Limited, Suite Five, Lloyds Wharf, Mill
Street, London SE5 2BA Tel 01 231 8565 Telex 886819 Fax 01 231 3712

ANNOUNCEMENTS

POLAR RECORD BACK NUMBERS 1931-87 (1-147)
are available from Bluntisham Books, Oak House, East
Street, Bluntisham PE17 3LS, UK, Tel (1487) 840 449.
Prices: Pre-1982 (1-129) £2.50 each; 1982-85
(130-141) £5.00 each; 1986-87 (142-47) £10.00
each. Postage extra.

ADVERTISING IN *Polar Record*

Quarter page (118 x 81 mm) : £50.00 (US\$90.00)

Half page (240 x 81 mm or 118 x 165) : £70.00
(US\$130.00)

Whole page (240 mm x 165 mm): £100.00
(US\$180.00)

Flier (A4 or A5): £100.00 (US\$180.00)

Announcements: £2.00 per column line.

VAT of 15% is payable on all UK orders. Please send
payment or an official order form with your order. There
are negotiable discounts for running the same advertis-
ment in three successive issues. We make up adver-
tisements (from £20.00) and print fliers (from £50.00) by
arrangement.

Polar and Glaciological Abstracts

A new abstracting journal produced by the
Scott Polar Research Institute, replacing
Recent Polar and Glaciological Literature,
the widest-circulation bibliography devoted to
polar subjects

- provides wide, annotated coverage of
books, papers, reports and reviews on all
aspects of polar life and science, both Arctic
and Antarctic

- subject, author and geographic indexes will
cumulate annually

- for further details contact:
Journals Publicity Department
Cambridge University Press
FREEPOST, Edinburgh Building
Shaftsbury Rd, Cambridge CB2 1ER UK

**New Zealand
1990
IN BRITAIN**

The United Kingdom/New Zealand 1990 Committee, in conjunction with the Scott Polar Research Institute, Cambridge, is staging a one-and-a-half day scientific symposium.

ANTARCTICA AND GLOBAL CLIMATE CHANGE

The place:

Selwyn College, Grange Road, Cambridge

The dates:

Tuesday 26 and Wednesday 27 June 1990.

Speakers will include Dr Trevor Hatherton (NZ), Dr Peter Barrett (NZ), Dr David Drewry (UK), Dr Peter Wadhams (UK), and many other New Zealand and UK Antarctic scientists. The guest speaker will be Sir Edmund Hillary.

To register, or for further information on this symposium, please contact:

**Simon Mark, UK/NZ 1990 Committee, New Zealand House, The Haymarket, London SW1Y 4TQ.
Tel. 01 839 3423.**

SCOTT POLAR RESEARCH INSTITUTE UNIVERSITY OF CAMBRIDGE Opportunities in Graduate Studies

M.Phil in Polar Studies

A one-year post-graduate course leading to the degree of Master of Philosophy, providing a broad background of polar knowledge and opportunity to study one topic in depth. Some 60 seminars cover the natural environment, peoples, history, resources, development and administration of the Arctic and Antarctic regions.

Ph.D and M.Sc studies

Courses leading to Ph.D and M.Sc are available. Many programmes relate to current research areas within the Institute. Options include glaciology, polar oceanography, marine biology, geophysics, remote sensing, history, anthropology, native rights and northern affairs.

Visiting scholars

The Institute provides facilities for advanced scholars wishing to pursue their own courses of study and research for periods of between a few weeks and one year.

Facilities

The Institute's research facilities include the world's finest polar library, outstanding archival collections and specialized laboratories, including two cold rooms (-40°C).

Cambridge University

The University now accommodates some 12,000 undergraduate and graduate students and has a long tradition of excellence in teaching and research.

ANTARCTIC science

As the only continent entirely dedicated to scientific use, Antarctica occupies a special place in international relations. In recent years scientific activities in and around the continent have markedly increased, resulting in a rapidly growing but increasingly diffuse literature. *Antarctic Science*, launched in 1989, was conceived both as a response to this trend and as an attempt to provide a focus for many of the interdisciplinary interests that characterize Antarctic studies.

Submission of articles

All articles should be sent to the *Editorial Assistant* at the *Editorial Office, British Antarctic Survey*. All submissions must be in English. Authors whose first language is not English are advised to seek assistance with their articles before submission. Articles submitted should not be under consideration for publication elsewhere. There is no fixed length for contributions but all should be as concise as possible. The acceptance of all articles will be subject to comments from two independent reviewers.

Subscription Information

Antarctic Science is published quarterly. Institutional subscription rates for 1990 are £55.00 (UK), £66.00 (overseas) and US\$115.00 (USA & Canada). Personal subscription rates for 1990 are £31.50 (UK), £39.00 (overseas) and US\$68.00 (USA & Canada). All rates include postage plus accelerated delivery to subscribers in all areas of the world outside Europe. All orders and requests for specimen copies should be sent to *Blackwell Scientific Publications Ltd., PO Box 88, Oxford, UK*.

Cambridge Journals

To meet the growing needs of today's scientists, Cambridge University Press brings you five new science journals in 1990. To order, or for further information and a sample copy fill in the coupon and return it to the address below.

Journal of Functional Programming

Editors:

R. J. M. HUGHES, *Department of Computing Science, Glasgow*
P. L. WADLER, *Department of Computing Science, Glasgow*
P. HUDAK, *Department of Computer Science, Yale University*
H. BARENDREGT, *Katholieke Universiteit Nijmegen*

Journal of Functional Programming is the first journal to be devoted to this important area of computer science. It covers new languages and extensions, reasoning, proof and program synthesis, implementation techniques, type theory, parallelism, and applications. The journal is of interest to computer scientists, engineers working in parallelism, and mathematicians working in theoretical science.

Volume 1 in 1990: two parts

Subscription

£60 for UK subscribers; £65/\$110 elsewhere; £40/\$70 for IFIP members

ISSN 0956-7968

Psychological Science

Editor:

WILLIAM K. ESTES, *Department of Psychology, Harvard University*

Published for the American Psychological Society

This publication is being launched as the flagship journal of the American Psychological Society and is the forum for research, theory and application in psychology and the closely related behavioural, cognitive, neural and social sciences. Unlike most research journals, *Psychological Science* encourages articles of general theoretical significance or of broad interest across specialities, written to be intelligible to a wide range of readers. Topics in the first volume include language in scientific psychology and similarities involving attributes and relations.

Volume 1 in 1990: January, March, May, July, September and November

Subscription

£65/\$100 for institutions; £30/\$50 for individuals

ISSN 0956-7976

Arabic Sciences and Philosophy: A Historical Journal

Executive Editors:

BASIM MUSALLAM, *Centre of Middle Eastern Studies, University of Cambridge*

ROSHDI RASHED, *Centre d'Histoire des Sciences et de la Philosophie Arabes, Centre National de la Recherche Scientifique*

JEAN JOLIVET, *L'Ecole Pratique des Hautes Etudes, Paris*
MUHSIN MAHDI, *Department of Eastern Languages and Literature, Harvard University*

This international journal is devoted to the history of the Arabic sciences, mathematics and philosophy in the world of Islam between the eighth and the eighteenth centuries in a cross-cultural context. *Arabic Sciences and Philosophy* casts new light on the growth of these disciplines as well as on the social and ideological context in which this growth took place. Articles are published in English, French or German with abstracts in all three languages.

Volume 1 in 1990: March and September

Subscription

£48/\$75 for institutions; £28/\$39 for individuals

ISSN 0957-4239

European Journal of Applied Mathematics

Editor-in-Chief:

JOHN OCKENDON, *Mathematical Institute, University of Oxford*

EJAM is a new journal for original work in areas of mathematics in which an understanding of the application requires the use of new and interesting mathematical ideas. The advent of powerful user-friendly computer codes in science and industry has increasingly led research workers to pose their problems in mathematical terms. Such activity frequently leads to a need for new mathematical analysis at a high level. EJAM will focus on this growing area of mathematics inspired by real world applications, and at the same time it will foster the development of theoretical methods with broad areas of applicability.

Volume 1 in 1990: March, June, September and December

Subscription

£75 for UK subscribers; £80/\$150 elsewhere; members of ECMI should write for special rates

ISSN 0956-7925

Polar and Glaciological Abstracts

Editor:

WILLIAM MILLS, *Scott Polar Research Institute, Cambridge*

Polar and Glaciological Abstracts is the first specialist abstracting publication to offer comprehensive coverage of the world's polar regions. Produced by the library of the Scott Polar Research Institute, it provides comprehensive and convenient access to the rapidly growing research and scholarship of all relevant disciplines. It scans over 900 series, plus relevant books, reports and theses. Each issue contains author, subject and geographic indexes. The indexes are cumulated annually.

Volume 1 in 1990: January, April, July and October

Subscription

£40/\$75 for institutions; £30/\$55 for individuals

ISSN 0957-5073

Cut out and return this coupon to: Journals Publicity Department, Cambridge University Press, FREEPOST*, Edinburgh Building, Shaftesbury Rd, Cambridge CB2 1BR, UK. In the US and Canada send to Cambridge University Press, 40 West 20th Street, New York, NY10011, USA.

*No stamp needed if posted in UK.

Cambridge Journals

postage. POSTMASTER: send address changes in the USA and Canada to *Polar Record*, Cambridge University Press, 110 Midland Avenue, Port Chester, New York, NY 10573.

Claims for missing issues can be considered only if made immediately after receipt of the subsequent issue.

Back Issues

For vols 1-23 inclusive apply to Bluntisham Books, Oak House, East Street, Bluntisham, Huntingdon, PE17 3LS, UK. For vols 24 onward apply to Cambridge University Press, UK or USA.

Advertising

Prices appear in the advertisements section; for details apply to the Editor or to the publishers.

Advice to contributors

Polar Record publishes original articles (2000 to 8000 words) and notes (usually less than 2000 words) of current and historic polar interest. Manuscripts, maps and photographs are accepted on the understanding that they are original, do not infringe copyright, and are not currently being offered elsewhere. Receipt is acknowledged; manuscripts are submitted to referees and any rejected will normally be returned to the author within six to eight weeks. Where the subject matter is appropriate, the Editor is usually prepared to advise authors on ways of making their material acceptable.

Presentation

Typescripts should be double-spaced with 3 cm margins, on one side only of A4 or similar paper. Send two copies and keep one for reference. Give name, affiliation and address of each author on the title page, noting which author the Editor corresponds with. Follow the style of articles and notes in the most recent issue of *Polar Record*.

Articles should start with an abstract of 150-250 words and a table of major headings; secondary and tertiary headings are not listed. Indicate in margins where tables and illustrations fit. Footnotes are discouraged; places where they are considered essential are marked in text with a superscript number, and the footnotes are listed at the end before the References.

Notes are short articles, generally of less than 2000 words. They do not require an abstract or table of headings, but either the first or the final paragraph should summarize the content.

References (essential ones only, please) are cited in text; full references appear in the listing under References at the end; for forms of citations and references see the most recent issue of *Polar Record*. *Authors alone are responsible for the accuracy of their references*. References to privately printed or other unpublished reports and data are not accepted unless copies of the material are freely available from a named library or similar repository. *Tables* should be kept as simple as possible and typed on separate sheets. They will normally be fitted across the single- or double-column page, only exceptionally lengthwise.

Illustrations. Drawings, maps and diagrams must be of professional standard, with lettering and numbers pencilled in clearly. Authors may be charged for re-drawing if an illustration is inadequate. They should if possible allow for about one-third reduction in width to fit a column (7.8 cm) or page (16.4 cm). Photographs (black and white only) that add substantially to the material are welcome. Glossy prints with high contrast, about one-third oversize, generally reproduce well.

Contributions on disc

The Editor welcomes contributions on floppy discs. The most suitable format is Apple Macintosh 3.5" disc. Output from a wide variety of word processing packages can be accepted, but in case of doubt, a MacWrite-compatible document should be produced. Diagrams also can be transferred on Macintosh discs. Discs from other microcomputers may be acceptable if the text is in the form of an ASCII file, with no word processing codes. TAB characters are acceptable. Currently, *Polar Record* can accept discs from Acorn BBC and Torch microcomputers, Amstrad PCW series microcomputers and, less readily, IBM PC compatible machines (5.25" discs only). In doubt, please consult the Editor.
