# The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY

WALTER HOWARTH

ASSISTED BY

W. M. MOLLISON

1. Original Articles are accepted on the condition that they have not been published elsewhere.

2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.

3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked and no additional matter added.

4. Orders for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied, on which the price of the reprints is stated.

5. Authors of Original Communications on Oto-Laryngology in other Journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.

6. Editorial Communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.

7. The Annual Subscription commencing with the January issue is Two Pounds sterling, post free, and is payable in advance.

8. Single copies, both of the present and the previous series, are on sale at Four Shillings each.

9. All Subscriptions, advertising and business communications should be sent to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.

### *United States of America*

Orders for this Journal may be sent either through a local bookseller, or to Messrs. G. E. STECHERT & Co., 31-33 East 10th Street, New York, or may be sent direct to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2, England.

*The first of a series of announcements describing electro-surgical technique with Marconi Diathermy equipments as the operative medium.*

## **Transverse Electro-Surgical Incision**

- 1** Cutting needle — preferably tungsten or fine steel.
- 2** Note angle of cutting needle.
- 3** Note absence of excessive sparking at point of contact.
- 4** Wound edges dry and covered with fine film of coagulum.
- 5** First incisional depth does not extend below subcutaneous fat.

Marconi Instruments Ltd. now have in production a wide range of Diathermy electro-surgical equipments designed for Ophthalmic, Brain, Urological and General Surgery. Full particulars, together with information upon their applications, are freely available on request.

**PRESCRIBE THE EASY EFFECTIVE METHOD**

When spraying, the patient can hold his head in a natural position, yet the solution spreads throughout the nasal cavity, assuring thorough treatment. Effective dropper-application, on the other hand, requires a complicated posture technique which patients are apt to neglect in home treatment.

**DeVilbiss  
ATOMIZERS**

**DROPPER ?**

**ATOMIZER?**

These illustrations, which are based on X-ray research, clearly demonstrate the advantages of the atomizer as compared with the dropper

SHORTENS THE COURSE OF INFECTION  
AND AVERTS SEQUELÆ TO COLDS

# 'SULFEX'

(A suspension of micro-crystalline ('Mickraform') sulphathiazole, 5%,  
in an isotonic solution of 'Paredrinex,' 1%).

'Sulfex'\* has proved strikingly effective, both with adults and children, in the treatment of nasal and sinus infections—especially those secondary to common colds. Nasopharyngeal sore throat often responds to 'Sulfex' within twenty-four hours. The suspension has the following advantages:—

(1) **PROLONGED BACTERIOSTASIS.** The 'Mickraform'\* crystals of free sulphathiazole are not quickly washed away, but form an even frosting over the nasal mucosa, thus providing prolonged bacteriostasis precisely where it is needed most.

(2) **NON-STIMULATING VASOCONSTRICTION.** While 'Paredrinex'\* exerts a rapid and complete shrinking action, it does not produce nervous side-effects such as restlessness and insomnia.

(3) **THERAPEUTICALLY IDEAL pH (5.5 to 6.5).** 'Sulfex' does not cause stinging or irritation. Its slightly acid pH range is identical with that of normal nasal secretions.

Available, on prescription only, in 1-oz. bottles with dropper.  
Price 5/1 including P.T. Special 8-oz. pack for hospitals.

Samples and further details on *signed* request of physicians.
