## IN SEARCH OF SECURITY

---

“National security” is a powerful and often ambiguous political concept with a long and troubled history in the Americas. In Mexico, the term has been little used. Until recently, emphasis has been placed instead on notions of sovereignty and national independence. Recent developments and problems, however, such as the discovery of oil, turmoil in Central America, drug trafficking, border issues with the United States, and a desire within the Mexican military for a clearer definition of its functions and responsibilities have directed attention to the concept.

In this volume, a group of noted specialists discuss the meaning of national security, its evolution in Mexico, and the possible elements of Mexico's future security agenda.

## **LATIN AMERICAN POLITICAL ECONOMY IN THE AGE OF NEOLIBERAL REFORM: Theoretical and Comparative Perspectives for the 1990s**

*William C. Smith, Carlos H. Acuña, and Eduardo A. Gamarra, editors*

In Latin America during the 1980s, the widely accepted model of economic development based upon import-substitution collapsed, triggering profound changes in relations among the state, civil society, and the market. In its place, neoliberal strategies pursued market-oriented restructuring to achieve external adjustment, tame hyperinflation, and discipline public sector finance. However, more people are now poorer with only marginal opportunities for equality, and a few people still hold most of the wealth and control productive resources. Frequently, governments have implemented new stabilization and structural adjustment policies autocratically, undermining democratic politics and the broadening of citizens' rights. This volume advocates a fundamental rethinking of central issues in Latin American political economy. Prominent political

scientists, economists, and sociologists from Latin America and the United States provide critical perspectives on the successes and failures of neoliberal reform. Several chapters explore alternative strategies for achieving economic growth along with enhanced equity and deepening democratic consolidation.
