

INSTRUCTIONS FOR CONTRIBUTORS

SUBMISSION OF MANUSCRIPTS

Manuscripts should be submitted online via our manuscript submission and tracking site, <http://www.editorialmanager.com/psm/>. Full instructions for electronic submission are available directly from this site. To facilitate rapid reviewing, communications for peer review will be electronic and authors will need to supply a current e-mail address when registering to use the system.

Papers for publication from Europe (except those on genetic topics, irrespective of country), and all papers on imaging topics, should be submitted to the UK Office.

Papers from the Americas, Asia, Africa, Australasia and the Middle East (except those dealing with imaging topics), and all papers dealing with genetic topics, irrespective of country, should be sent to US Office.

Generally papers should not have text more than 4500 words in length (excluding these sections) and should not have more than a combined total of 5 tables and/or figures. Papers shorter than these limits are encouraged. For papers of unusual importance the editors may waive these requirements. A structured abstract of no more than 250 words should be given at the beginning of the article using the headings: Background; Methods; Results; Conclusions. The name of an author to whom correspondence should be sent must be indicated and a full postal address given in the footnote. Any acknowledgements should be placed at the end of the text (before the References section).

Declaration of Interest: A statement must be provided in the acknowledgements listing all financial support received for the work and, for all authors, any financial involvement (including employment, fees, share ownership) or affiliation with any organization whose financial interests may be affected by material in the manuscript, or which might potentially bias it. This applies to all papers including editorials and letters to the editor.

Contributors should also note the following:

1. S.I. units should be used throughout in text, figures and tables.
2. Authors should spell out in full any abbreviations used in their manuscripts.
3. Foreign quotations and phrases should be followed by a translation.
4. If necessary, guidelines for statistical presentation may be found in: **Altman DG, Gore SM, Gardner MJ & Pocock SJ** (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

REFERENCES The APA referencing system should be used in the text and a complete list of References cited given at the end of the article. In a text citation of a work by more than two authors cite the first author's name followed by et al. In the References section. Where several references are cited together they should be listed in rising date order. The References section should be supplied in alphabetical order listing all authors up to 7 in number, or the first 6 authors plus the last author, date, article title, journal title in full, volume, page numbers and/or DOI. (authors' names in bold, journal titles in full), following the text. Some examples follow:

Journal article with DOI:

Nevin, A. (1990). The changing of teacher education special education. *Teacher Education and Special Education: The Journal of the Teacher Education Division of the Council for Exceptional Children*, 13(3-4), 147-148. doi:XXX

Light, M. A., & Light, I. H. (2008). The geographic expansion of Mexican immigration in the United States and its implications for local law enforcement. *Law Enforcement Executive Forum Journal*, 8, 73–82. doi:XXX

Journal article without DOI (when DOI is not available):

Good, C. D., Johnsrude, I. S., Ashburner, J., Henson, R. N. A., Firston, K. J., & Frackowiak, R. S. J. (2001). A voxel-based morphometric study of ageing in 465 normal adult human brains. *NeuroImage*, 14, 21–36. Retrieved from <http://xxxx>

No retrieval date is needed.

Journal article with DOI, more than seven authors:

Gilbert, D. G., McClernon, F. J., Rabinovich, N. E., Sugai, C., Plath, L. C., Asgaard, G., ... Botros, N. (2004). Effects of quitting smoking on EEG activation and attention last for more than 31 days and are more severe with stress, dependence, DRD2 A1 allele, and depressive traits. *Nicotine and Tobacco Research*, 6, 249–267. doi:XXX

Citations for Websites:

Simmons, B. (2015, January 9). The tale of two Flaccos. Retrieved from <http://grantland.com/the-trian...>

[Authors are requested to print-out and keep a copy of any online-only material, in case the URL changes or is no longer maintained.]

FIGURES AND TABLES Only essential figures and tables should be included. Further tables, figures, photographs and appendices, may be included with the online version on the journal website. To ensure that your figures are reproduced to the highest possible standards, Cambridge Journals recommends the following formats and resolutions for supplying electronic figures. Please ensure that your figures are saved at final publication size and are in our recommended file formats. Following these guidelines will result in high quality images being reproduced in both the print and the online versions of the journal. **Line artwork:** Format: tif or eps, Colour mode: black and white (also known as 1-bit), Resolution: 1200 dpi; **Combination artwork (line/tone):** Format: tif or eps, Colour mode: grayscale (also known as 8-bit), Resolution: 800 dpi; **Black and white halftone artwork:** Format: tif, Colour mode: grayscale (also known as 8-bit), Resolution: 300 dpi; **Colour halftone artwork:** Format: tif, Colour mode: CMYK colour, Resolution: 300 dpi. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in Arabic numerals. Captions for figures should be typed double-spaced on separate sheets. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet after the References section. Titles should be typed above the table.

PROOFS Page proofs will be sent to the author designated to receive correspondence, corrections other than to printer's errors may be charged to the author. The corresponding author of each paper will receive a PDF file of their article.

PSYCHOLOGICAL MEDICINE

CONTENTS

REVIEW ARTICLE

Reporting of harms in clinical trials of esketamine in depression: a systematic review
Taillefer de Laportalière T et al

4305

ORIGINAL ARTICLES

Sustained specialized and family treatment in first-episode schizophrenia or related disorders: a 5-year randomized controlled trial
de Haan L et al

4316

Objective measures of reward sensitivity and motivation in people with high v. low anhedonia
Slaney C et al

4324

Multimorbidity clusters among people with serious mental illness: a representative primary and secondary data linkage cohort study
Ma R et al

4333

Reduced anhedonia following internet-based cognitive-behavioral therapy for depression is mediated by enhanced reward circuit activation
Hanuka S et al

4345

Associations of neuroimaging markers with depressive symptoms over time in middle-aged and elderly persons
Özel F et al

4355

Trends in suicide attempts and suicide deaths before and during the COVID-19 pandemic in New Taipei City, Taiwan: an interrupted time-series analysis
Su Y-J et al

4364

Virtual reality (VR) therapy for patients with psychosis: satisfaction and side effects
Freeman D et al

4373

Multiple serum biomarkers for predicting suicidal behaviours in depressive patients receiving pharmacotherapy
Kim J-M et al

4385

Risk of psychosis among migrants to the Netherlands by time since arrival
Temorshuizen F et al

4395

Evaluating the role of maladaptive personality traits in schema therapy and cognitive behavioural therapy for depression
Rek K et al

4405

A lifespan perspective on depression in the postpartum period in a racially and socioeconomically diverse sample of young mothers
Hipwell AE et al

4415

Multi-modal assessment of reward functioning in adolescent anhedonia
Murray L et al

4424

Online harms? Suicide-related online experience: a UK-wide case series study of young people who die by suicide
Rodway C et al

4434

Effects of religion on the course of suicidality among geriatric patients with mood disorders
Rosmarin DH et al

4446

Cognitive performances across individuals at high genetic risk for schizophrenia, high genetic risk for bipolar disorder, and low genetic risks: a combined polygenic risk score approach
Ohi K et al

4454

Volume of hippocampus-amygdala transition area predicts outcomes of electroconvulsive therapy in major depressive disorder: high accuracy validated in two independent cohorts
Xu J et al

4464

Is an elevated family-genetic risk for major psychiatric disorders specific to creative occupations?
Kendler KS et al

4474

Continuity of psychopathology v. resilience across the transition to adolescence: role of hair cortisol and sensitive caregiving
Yamaya K et al

4487

Statistical power in clinical trials of interventions for mood, anxiety, and psychotic disorders
de Vries YA et al

4499

Cumulative lifetime acute stressor exposure interacts with reward responsiveness to predict longitudinal increases in depression severity in adolescence
Burani K et al

4507

Alterations in resting-state functional activity and connectivity for major depressive disorder appetite and weight disturbance phenotypes
Piccolo M et al

4517

Long-term associations between early-life family functioning and preadolescent white matter microstructure
Delaney SW et al

4528

Sex differences in conduct and emotional outcomes for young people with hyperactive/inattentive traits and social communication difficulties between 9 and 16 years of age: a growth curve analysis
Hollingdale J et al

4539

Do antidepressants prevent transition to psychosis in individuals at clinical high-risk (CHR-P)? Systematic review and meta-analysis
Raballo A et al

4550

Comparative effectiveness of group v. individual trauma-focused treatment for posttraumatic stress disorder in veterans
Spiller TR et al

4561

Self-evaluation of social-rank in socially anxious individuals associates with enhanced striatal reward function
Shany O et al

4569

A broad v. focused digital intervention for recurrent binge eating: a randomized controlled non-inferiority trial
Linardon J et al

4580

Reduced fractional anisotropy in bipolar disorder v. major depressive disorder independent of current symptoms
Thiel K et al

4592

Prevalence and correlates of suicidal behaviours in a representative epidemiological youth sample in Hong Kong: the significance of suicide-related rumination, family functioning, and ongoing population-level stressors
Wong SMY et al

4603

Cognitive bias modification for paranoia (CBM-pa): a randomised controlled feasibility study in patients with distressing paranoid beliefs
Yeend J et al

4614

Hallucinations as a risk marker for suicidal behaviour in individuals with a history of sexual assault: a general population study with instant replication
Yates K et al

4627

Link between cognitive polygenic risk scores and clinical progression after a first-psychotic episode
Segura AG et al

4634

Trajectories of depression and generalised anxiety symptoms over the course of cognitive behaviour therapy in primary care: an observational, retrospective cohort
Bauer-Staeb C et al

4648

Sequencing of symptom emergence in anorexia nervosa, bulimia nervosa, binge eating disorder, and purging disorder in adolescent girls and relations of prodromal symptoms to future onset of these eating disorders
Yamamiya Y et al

4657

Attention allocation to negatively-valenced stimuli in PTSD is associated with reward-related neural pathways
Suarez-Jimenez B et al

4666

Patterns of polysomnography parameters in 27 neuropsychiatric diseases: an umbrella review
Zhang Y et al

4675

Contextual influence of reinforcement learning performance of depression: evidence for a negativity bias?
Vandendriessche H et al

4696

Shared and distinct white matter abnormalities in adolescent-onset schizophrenia and adolescent-onset psychotic bipolar disorder
Seitz-Holland J et al

4707

Resting-state functional connectivity patterns associated with childhood maltreatment in a large bicentric cohort of adults with and without major depression
Gottemann J et al

4720

Cannabidiol attenuates insular activity during motivational salience processing in patients with early psychosis
Gunasekera B et al

4732

Autonomic indices and loss-of-control eating in adolescents: an ecological momentary assessment study
Ranzenhofer LM et al

4742

Aerobic exercise enhances cognitive training effects in first-episode schizophrenia: a randomized clinical trial demonstrates cognitive and functional gains
Nuechterlein KH et al

4751

Cumulative environmental risk in early life is associated with mental disorders in childhood
O'Hare K et al

4762

Origins of spousal cross-concordance for psychiatric disorders: a test of the social stress theory for alcohol use disorder
Salvatore JE et al

4772

Neural correlates of referential/persecutory delusions in schizophrenia: examination using fMRI and a virtual reality underground travel paradigm
Fuentes-Claramonte P et al

4780

Executive function as a generalized determinant of psychopathology and functional outcome in school-aged autism spectrum disorder: a case-control study
Wong OWH et al

4788

Acute neural effects of fluoxetine on emotional regulation in depressed adolescents
Capitão LP et al

4799

Safety outcomes of selective serotonin reuptake inhibitors in adolescent attention-deficit/hyperactivity disorder with comorbid depression: the ASSURE study
Kim C et al

4811

CORRESPONDENCE

Dementia in Scottish military veterans: early evidence from a retrospective cohort study
Chen H-Y et al

4820

Reduction of impulsivity after an impulsivity-focused group intervention in patients with binge eating disorder in a long-term follow-up of the randomized controlled IMPULS trial
Schag K et al

4821

Life events and functional neurological disorders
House A

4823

The burgeoning role of speech and language assessment in schizophrenia spectrum disorders
DeSouza DD et al

4825

Increased levels of intestinal-type fatty acid-binding protein (I-FABP) in mood disorders
Aronne D

4827

Epigenetic and translational psychology: admitting mistakes is not a weakness but a prerequisite for scaling up
Brailion A et al

4829

CORRIGENDUM

Safety Outcomes of Selective Serotonin Reuptake Inhibitors in Adolescent Attention-Deficit/Hyperactivity Disorder with Comorbid Depression: The ASSURE Study – CORRIGENDUM
Kim C et al

4831

Antipsychotic medication for women with schizophrenia spectrum disorders – CORRIGENDUM
Brand BA et al
