

INDEX TO VOLUME 2

- Albus, J. S.**, *See* Kent & Albus
- Antigue, F.**, *See* Francois & Antigue
- Billingsley, J.**, *See* Naghdy, Billingsley & Harrison
- Camacho, M.**, *See* Davis & Camacho
- Camacho, M.**, *See* Davis & Camacho
- Davis, R. H., & Camacho, M.**, The application of logic programming to the generation of paths for robots, 93–103
- Davis, R. H., & Camacho, M.**, The application of logic programming to the generation of plans for robots, 137–146
- Devyanin, E. A.**, *See* Gurfinkel, Devyanin, Lensky, Mozhzhevelov, Formal'sky & Shneider
- Doi, H.**, *See* Fukada, Doi, Nagamine & Inari
- El Gindy, H. A.**, *See* Toussaint & El Gindy
- Fleck, J.**, Introduction of the industrial robot in Britain, 169–175
- Formal'sky, A. M.**, *See* Gurfinkel, Devyanin, Lensky, Mozhzhevelov, Formal'sky & Shneider
- Francois, C., & Artigue, F.**, Automated assembly by reference measurement, 197–201
- Fukada, Y., Doi, H., Nagamine, K., & Inari, T.**, Relationships—based recognition of structural industrial parts stacked in a bin, 147–154
- Fu, K. S.**, Special computer architectures for image analysis, 27–31
- Furuta, K., Kosuge, K., Yamano, O., & Nosaki, K.**, Robust control of a robot manipulator with nonlinearity, 75–81
- Gurfinkel, V. S., Devyanin, E. A., Lensky, A. V., Mozhzhevelov, S. B., Formal'sky, A. M., & Schneider, A. Yu.**, Controlling a manipulator using sensory motor interaction, 155–159
- Harrison, D.**, *See* Naghdy, Billingsley & Harrison
- Ikeda, J.**, *See* Sawano, Ikeda, Utsumi, Ohtani, Kirkuchi, & Ito
- Inari, T.**, *See* Fukada, Doi, Nagamine & Inari
- Inari, T.**, *See* Kuroda, Jitsumori & Inari
- Ito, Y.**, *See* Sawano, Ikeda, Utsumi, Ohtani, Kirkuchi, & Ito
- Jarvis, R. A.**, Application-oriented robotic vision—a review, 3–15
- Jarvis, R. A., & Oh, Y. L.** Introduction to the special issue on robotic vision, 1
- Jitsumori, A.**, *See* Kuroda, Jitsumori & Inari
- Karnik, A. M., & Sinha, N. K.**, A direct approach to modeling an industrial robot from samples of input-output data, 161–167
- Kent, Ernest W., & Albus, James S.** Servoed world models as interfaces between robot control systems and sensory data, 17–25
- Kirkuchi, A.**, *See* Sawano, Ikeda, Utsumi, Ohtani, Kirkuchi, & Ho
- Kosuge, K.**, *See* Furata, Kosuge, Yamano & Nosaki
- Kuroda, S., Jitsumori, A., & Inari, T.**, Ultrasonic imaging system for robots using an electronic scanning method, 47–53
- Lee, M. H.**, The three robot worlds—a view point (A review of the different goals of robotics research), 71–74
- Lensky, A. V.**, *See* Gurfinkel, Devyanin, Lensky, Mozhzhevelov, Formal'sky & Shneider
- Matsuda, F.**, *See* Yamada, Matsuda, Tsuchida & Ueda
- Mozhzhevelov, S. B.**, *See* Gurfinkel, Devyanin, Lensky, Mozhzhevelov, Formal'sky & Shneider
- Nagamine, K.**, *See* Fukada, Doi, Nagamine & Inari
- Naghdy, F., Billingsley, J., & Harrison, D.**, Simulation of human judgement in a robot-based adjustment system, 209–214
- Nosaki, K.**, *See* Furuta, Kosuge, Yamano & Nosaki

- Ohtani, Y.**, *See* Sawano, Ikeda, Utsumi, Ohtani, Kirkuchi & Ito
- Oh, Y. L.**, *See* Jarvis & Oh
- Ranky, P. G.**, Programming industrial robots in FMS (A survey with particular reference to off-line, high-level robot program generation using VAL, VAL-II, AML and MARTI), 87–92
- Salter, R. M.**, Declarative modeling of symbolic continuous processes in a robot simulation system, 105–109
- Sawano, S., Ikeda, J., Utsumi, N., Ohtani, Y., Kirkuchi, A., & Ito, Y.**, A sealing robot system with visual seam tracking, 41–46
- Sternberg, Stanley R.**, Parallel processing in machine vision, 33–40
- Shivarov, N., & Yanakiev, K.**, Automated manipulating system for an industrial robot for arc-welding, 203–207
- Shneider, A Yu.**, *See* Gurfinkel, Devyanin, Lensky, Mozhzhevelov, Formal'sky & Shneider
- Sinha, N. K.**, *See* Kernik & Sinha
- Toussaint, G. T. & El Gindy, H. A.**, Separation of two monotone polygons in linear time, 215–220
- Tsuchida, N.**, *See* Yamada, Matsuda, Tsuchida & Ueda
- Ueda, M.**, *See* Yamada, Matsuda, Tsuchida & Ueda
- Utsumi, N.**, *See* Sawano, Ikeda, Utsumi, Ohtani, Kirkuchi & Ito
- Yamada, Y., Matsuda, F., Tsuchida, N. & Ueda, M.**, Sensor control for moving objects, 83–86
- Yamano, O.**, *See* Furuta, Kosuge, Yamano & Nosaki
- Yanakiev, K.**, *See* Shivarov & Yanakiev

INDEX OF BOOKS REVIEWED IN VOLUME 2

The name of the reviewer of the book is given in parentheses

- Aleksander, I. & Burnet, P.** *Reinventing Man: The Robot Becomes Reality.* (A. M. ANDREW), 118
- Aleksander, I.** (Ed.) *The International Robotics Yearbook.* (J. ROSE) 246
- Brock, T. E.** (Ed.) *Proceedings of the Sixth British Robot Association annual conference.* (A. M. ANDREW), 117
- Coiffet, P.**, *Robot Technology: Vol. 1: Modelling and Control.* (M. W. THRING) 181
- Coiffet, P.** *Robot Technology, Vol. 2.* (M. W. THRING) 247
- Hartley, J.** *Robots at Work: A Practical Guide for Engineers and Managers.* (A. M. ANDREW) 118
- Hayes-Roth, F., Waterman, D. A. & Lenal, D. B.** (Eds) *Building Expert Systems.* (J. SELF) 119
- Helmers, C. T.** (Ed.) *In the Beginning: The Breakthrough Discoveries as Reported in Robotics Age Magazine.* (A. M. ANDREW) 118–119
- Hicks, D. J.** (Ed.) *Semi-Custom IC Design and VLSI.* (J. A. ESROM) 245
- Isata 83 Proceedings.** (P. G. RANKY) 120–121
- Kogan, A. B. et al.** (Eds) *Problemy Neirokibernetiki.* (E. NICOLAU) 179
- Lasers in Manufacturing.** *Proceedings First International Conference.* (M. W. THRING) 179–180
- Lhote, F., Kauffmann, J.-M., Andre, P. & Taillard, J.-P.** *Robot Components and Systems.* (P. G. RANKY) 246
- Makino, H.** (Ed.) *Proceedings of the Fourth International Conference on Assembly Automation.* (M. W. THRING) 180–181
- McLean, M.** (Ed.) *Mechatronics.* (H. H. ROSENBROCK) 120
- Microelectronics, Robotics and Jobs** (OECD Report, ICCP No. 7). (H. H. ROSENBROCK) 119
- O'Shea, T. & Eisenstadt, M.** (Eds) *Artificial Intelligence: Tools, Techniques, and Applications.* (A. M. ANDREW) 177
- Sadamoto, K.** (Ed.) *Mechanical Hands—Illustrated.* (A. M. ANDREW) 117
- The Software Catalog, Microcomputers.** (J. A. ESTOM) 245
- The Software Catalog, Minicomputers.** (J. A. ESROM) 245
- United Nations Economic and Social Council, Production and Use of Industrial Robots, Part 1.** (P. ESROM) 177–178
- White, J. A.** (Ed.) *Automation in Warehousing. Proceedings of the Fifth International Conference, Georgia, USA.* (M. W. TRING) 178–179

Notes for Contributors

1. Manuscripts should preferably be written in English, but papers in French and German will also be accepted. All manuscripts will be referred to acknowledged experts in the subject. Only those receiving favourable recommendations from the referees will be accepted for publication. Manuscripts may be sent to any Board member, any Deputy Editor or the Editor.

2. Typescripts should be double spaced, on one side of good grade paper, allowing a reasonable left-hand margin. An original and two copies should be submitted with the author's full postal address, position and affiliations.

3. A short abstract of about 80 words should precede the main text. *List of symbols:* A typewritten list of any special symbols should be submitted with the manuscript. The list should not define the symbols mathematically, but should serve to identify them typographically. The list will not appear in print, but is essential to help the typesetter and to avoid costly correction in proof.

4. One copy of photographs, prints or transparencies of good quality and unmarked should be submitted. Where lines or lettering are to appear on the photograph, an additional print should be supplied appropriately marked. Each should have, lightly written on the back, the author's name, the figure number and an indication of which is the top of the picture.

5. One copy of each line diagram should be submitted at approximately twice final size and unlettered. Diagrams must be drawn in indian ink on plain white or transparent paper. A second copy should be supplied with lettering included. The author's name and the figure number should be written on this copy. Figures should be numbered consecutively, with arabic numerals, have descriptive captions, and be mentioned in the text. The correct position for each figure should be indicated in the margin of the manuscript.

6. Tables should be typewritten on separate sheets. Avoid, where possible, very wide tables. Number tables

consecutively with roman numerals. Each should have a brief heading. Exceptionally lengthy tables may be summarized for publication with a note that copies of details can be obtained from the authors.

7. Equations: Wherever possible, mathematical equations should be typewritten, with subscripts and superscripts clearly indicated. The printer will set all mathematical symbols in italics unless otherwise indicated; symbols or letters to be set in roman (upright) type should be encircled in pencil, while bold letters should be shown by a wavy underline.

8. References: In the text, references are indicated by superior arabic numbers (without brackets), and should be confined to publish work that is directly pertinent. References should be listed at the end of the paper in numerical order. Authors' initials should precede their names; cited article titles should be quoted in full, enclosed in quotation marks; and abbreviations of journal names should follow the style of *Chemical Abstracts* or *Physical Abstracts*, and be underlined for italics: P.W. Anderson, "More is different" *Science* **177**, 393 (1972) C.V. Negoita, *Fuzzy Systems* (Abacus Press, Tunbridge Wells, UK, 1980)

Citations such as 'personal communication', 'unpublished work', etc., are not acceptable as numbered references but can be included in parenthesis in the text. Do not use summaries as references.

9. Proofs: Page proofs will be sent to authors for correction, for return within 48 hours by airmail. Correction to proofs should be restricted to printers' errors only. Authors are entitled to 25 offprints of their article free of charge. Additional offprints may be purchased if they are ordered on the form sent with the proofs.

10. Manuscripts, whether accepted or rejected, will not be returned to the authors.

11. Submission of an article will be taken to imply that it has not been previously published and that it is not on offer to any other publisher.

ROBOTICA

Volume 3 Part 1

January–March 1985

CONTENTS

Reports and Surveys (Education and Training in Robotics, Microcomputers—The QL Saga, Models of Remembrance, New Products and Projects, Robot Competitions, Robot Slaves, Robotics Worldwide, Superbrains) R. H. Rudall (U.K.)	1
Real-time cooperative interaction between structured-light and reflectance ranging for robot guidance, Ernest W. Kent, Thomas Wheatley and Marilyn Nashman (U.S.A.)	7
Robots and mining: the implications for Australian industry in the 1980's, M. Kassler (Australia)	13
An efficient numerical approach for calculating the inverse kinematics for robot manipulators, Jadran Lenarčić (Yugoslavia)	21
The effect of information technology on manufacturing, Professor I. Aleksander (U.K.)	27
Towards automatic software generation, B. H. Rudall (U.K.)	31
Changing needs of industrial and commercial education and training, R. G. Taylor (U.K.)	35
A fuzzy model for learning in automata, Ashoke Kumar Datta (India)	39
Obituary	45
Special Feature	47
Conference Reports	51
Book Reviews	55
Announcements	57
